END-TO-END BA CASE STUDY

ShopEasy Ecommerce Platform

Seller Onboarding Self-Service Portal

Document Type	End-to-End BA Case Study (BRD + User Stories + Gap Analysis + RTM)
Domain	Retail Ecommerce | Marketplace Operations
Prepared By	Yash Isokar | Business Analyst
Version	1.0 — Final
Date	April 2026
Status	**Approved**

1. Executive Summary

ShopEasy is a retail ecommerce marketplace connecting buyers and third-party sellers across India. Currently ShopEasy onboards new sellers through a fully manual process involving emails, phone calls, physical document submission, and manual IT account creation. This process takes 2 to 3 weeks on average, has a 35% error rate due to incomplete submissions, and is causing significant seller dissatisfaction and revenue loss.

This case study documents the complete Business Analysis for a Seller Onboarding Self-Service Portal — a digital platform that enables sellers to register, submit documents, complete verification, set up payment details, and list their first products entirely online without any manual intervention from ShopEasy operations team.

1.1 Business Problem

Problem Statement

ShopEasy's manual seller onboarding process takes 2-3 weeks per seller, requires 12-15 back-and-forth email exchanges, has a 35% document error rate causing re-submissions, and results in 40% of interested sellers dropping off before completing onboarding. The Operations team spends 60% of their time on manual data entry and document verification instead of strategic activities. ShopEasy is losing an estimated Rs. 85 lakh per month in potential GMV (Gross Merchandise Value) from sellers who abandon the process due to its complexity and length.

1.2 Proposed Solution

- Build a self-service digital portal where sellers complete entire onboarding independently
- Digital document upload with automated format and completeness validation
- Automated legal and GST verification via government APIs
- Digital contract signing using eSign integration
- Automated IT account creation and seller dashboard access upon approval
- Real-time application status tracking for sellers
- Email and SMS notifications at every onboarding stage

1.3 Business Goals and Success Metrics

Business Goal	Current State	Target (6 months)
Reduce onboarding time	2-3 weeks	3 business days
Reduce seller drop-off rate	40%	Below 15%
Reduce document error rate	35%	Below 5%
Reduce operations manual effort	60% time on manual tasks	Below 20%
Increase new seller activations/month	120 sellers/month	350 sellers/month
Improve seller satisfaction score	2.8 / 5.0	Above 4.2 / 5.0

2. Stakeholder Analysis

2.1 Stakeholder Register

Stakeholder	Role	Department	Interest / Concern	Influence
VP Marketplace	Executive Sponsor	Business	GMV growth, seller base expansion	Very High
Seller / Vendor	Primary User	External	Fast, simple, transparent onboarding	Very High
Operations Manager	Process Owner	Operations	Reduce manual workload, fewer errors	High
Legal and Compliance	Reviewer	Legal	Regulatory compliance, valid documents	High
IT / Dev Team	Builder	Technology	Technical feasibility, integrations	High
Finance Team	Approver	Finance	Bank verification, payment setup	Medium
Seller Support Team	Internal User	Operations	Clear escalation, fewer queries	Medium
Government APIs	External System	External	GST and PAN verification accuracy	Medium
QA Team	Validator	Technology	Requirement coverage, defect prevention	Low

2.2 RACI Matrix

Activity	BA	VP Mktpl.	Ops Mgr	Legal	IT Team	Finance
Requirement Gathering	**R**	C	C	C	I	I
BRD Sign-Off	**R**	A	C	C	I	I
UI/UX Design	**C**	I	I	I	R	I
Development	**C**	I	I	I	R	I
Legal Compliance Review	**C**	I	I	R/A	I	I
UAT Sign-Off	**C**	A	R	R	C	C

R = Responsible A = Accountable C = Consulted I = Informed

3. Project Scope

3.1 In Scope

- Seller self-registration with business email and mobile verification
- Digital document upload — GST Certificate, PAN Card, Bank Cancelled Cheque, Business Address Proof
- Automated GST and PAN verification via government APIs
- Automated bank account verification via penny drop method
- Digital contract and agreement signing via eSign integration
- Operations team review dashboard for manual override if needed
- Automated seller account creation and dashboard access upon approval
- Application status tracking portal for sellers
- Email and SMS notifications at all key onboarding stages
- First product listing guidance after account activation

3.2 Out of Scope

- Mobile app (iOS and Android) — Phase 2
- International seller onboarding — India sellers only in Phase 1
- Bulk seller import or CSV upload for enterprise sellers
- Seller training or academy content — separate initiative
- Product catalogue migration from other platforms
- Seller performance management and rating system

3.3 Assumptions and Dependencies

- Government GST verification API is available and operational
- eSign provider integration is approved by Legal team
- Penny drop bank verification service is contracted with payment partner
- Operations team will handle exception cases that fail automated verification
- Sellers must have valid GST registration to onboard on ShopEasy

4. Current State — AS-IS Seller Onboarding Process

The current seller onboarding process is entirely manual, paper-based, and dependent on Operations team availability. The following table documents each step of the current process along with its pain points.

Step	Step Name	Who Does It	How Long	Pain Point
1	Seller inquiry	Seller contacts via email or phone	1-2 days to get response	No self-service option, slow response
2	Send onboarding form	Operations emails Word/PDF form	1 day	Manual effort, outdated forms often sent
3	Seller fills and returns form	Seller fills manually and emails back	2-4 days	35% error rate, incomplete submissions
4	Document collection	Operations requests docs via email	3-5 days back and forth	Multiple follow-ups, docs lost in email
5	Legal verification	Legal team reviews manually	3-5 business days	Bottleneck — Legal team overloaded
6	Finance bank verification	Finance team manually verifies bank	2-3 days	Manual process, errors in account details
7	Contract signing	Physical or scanned signed agreement	2-3 days	Physical printing, scanning, mailing
8	IT account creation	IT team manually creates seller account	1-2 days	Dependent on IT availability, manual errors
9	Seller activated	Operations informs seller via email	Total: 2-3 weeks	Seller already frustrated or dropped off

5. Future State — TO-BE Seller Onboarding Process

The proposed Seller Onboarding Self-Service Portal reduces the onboarding journey from 9 manual steps taking 2-3 weeks to 5 digital steps completing in 3 business days with minimal Operations team involvement.

Step	Step Name	Who Does It	How Long	Improvement
1	Self-registration	Seller registers on portal independently	15-20 minutes	No Operations involvement needed
2	Digital document upload	Seller uploads docs on portal	30-45 minutes	Instant validation, no email needed
3	Automated verification	System verifies GST, PAN, and bank	1-2 hours (automated)	No Legal or Finance manual review
4	Digital contract signing	Seller signs digitally via eSign	10-15 minutes	No physical paperwork needed
5	Auto account creation	System creates seller account automatically	Instant upon approval	No IT manual effort needed

5.1 Gap Analysis — AS-IS vs TO-BE

Area	AS-IS (Current)	TO-BE (Future)	Gap / What Needs to Be Built
Seller Registration	Manual email request to Operations	Self-service portal registration	Build seller registration module
Document Collection	Email attachments, high error rate	Digital upload with auto-validation	Build document upload and validation engine
GST Verification	Manual Legal team review (3-5 days)	Automated API verification (minutes)	Integrate Government GST verification API
PAN Verification	Manual check by Legal team	Automated PAN API verification	Integrate PAN verification API
Bank Verification	Manual Finance team process (2-3 days)	Automated penny drop verification	Integrate penny drop bank verification
Contract Signing	Physical document, scan, email	Digital eSign — minutes	Integrate eSign service provider
Account Creation	Manual IT team task (1-2 days)	Automated on approval	Build automated provisioning module
Status Visibility	Seller has no visibility — calls/emails	Real-time status dashboard for seller	Build application tracking portal
Total Time	2-3 weeks	3 business days	Remove all manual handoffs

6. Functional Requirements

6.1 Seller Registration Requirements

Req ID	Requirement Description	Priority	Type
REG-001	Seller shall be able to register on the portal using a valid business email address	High	Functional
REG-002	System shall send OTP to registered email and mobile number for verification during signup	High	Functional
REG-003	System shall validate that the business email is not already registered on ShopEasy seller portal	High	Functional
REG-004	Seller shall provide business details during registration: Business Name, Business Type, GST Number, PAN Number, Business Address	High	Functional
REG-005	System shall display registration progress indicator showing completed and pending steps	Medium	Functional
REG-006	Seller shall be able to save registration progress and resume later within 7 days	Medium	Functional

6.2 Document Upload Requirements

Req ID	Requirement Description	Priority	Type
DOC-001	Seller shall be able to upload GST Certificate in PDF or JPG format not exceeding 5MB	High	Functional
DOC-002	Seller shall be able to upload PAN Card in PDF or JPG format not exceeding 5MB	High	Functional
DOC-003	Seller shall be able to upload Bank Cancelled Cheque or Bank Statement in PDF format not exceeding 5MB	High	Functional
DOC-004	Seller shall be able to upload Business Address Proof (Utility Bill or Rent Agreement) in PDF format	High	Functional
DOC-005	System shall validate file format and size before accepting upload and display clear error if invalid	High	Functional
DOC-006	System shall display upload status (Uploaded, Pending, Rejected) for each document on seller dashboard	High	Functional
DOC-007	Seller shall be able to re-upload a rejected document with the rejection reason clearly displayed	High	Functional

6.3 Automated Verification Requirements

Req ID	Requirement Description	Priority	Type
VER-001	System shall automatically verify GST number via government GSTIN API within 30 minutes of document upload	High	Functional
VER-002	System shall automatically verify PAN number via NSDL PAN verification API within 30 minutes of upload	High	Functional

VER-003	System shall verify bank account details via penny drop method — credit Re.1 and verify confirmation	High	Functional
VER-004	System shall notify seller via email and SMS immediately when verification passes or fails	High	Functional
VER-005	If automated verification fails system shall route application to Operations team for manual review within 24 hours	High	Functional
VER-006	Operations team shall be able to approve or reject any verification step manually from admin dashboard	Medium	Functional

6.4 Contract Signing Requirements

Req ID	Requirement Description	Priority	Type
CON-001	System shall send seller agreement document for digital signing via eSign integration after verification approval	High	Functional
CON-002	Seller shall be able to review complete seller agreement before signing	High	Functional
CON-003	System shall capture digital signature with timestamp and IP address for legal validity	High	Functional
CON-004	System shall send signed agreement copy to seller email within 5 minutes of signing	High	Functional
CON-005	Seller contract signing link shall expire after 48 hours if not signed and a new link shall be sent	Medium	Functional

6.5 Account Activation Requirements

Req ID	Requirement Description	Priority	Type
ACT-001	System shall automatically create seller account and dashboard access within 2 hours of contract signing	High	Functional
ACT-002	Seller shall receive welcome email with login credentials and getting started guide upon account activation	High	Functional
ACT-003	Seller dashboard shall display onboarding completion status and first steps for listing products	High	Functional
ACT-004	Operations team shall receive notification when new seller account is activated for records	Medium	Functional

6.6 Application Status Tracking Requirements

Req ID	Requirement Description	Priority	Type
TRK-001	Seller shall be able to view real-time application status on their portal showing each stage as Completed, In Progress, or Pending	High	Functional
TRK-002	System shall send email and SMS notification to seller at every stage change in the onboarding process	High	Functional
TRK-003	Seller shall receive reminder notification if an action is pending	Medium	Functional

	on their side for more than 24 hours		
TRK-004	Operations team shall have a dashboard showing all seller applications with status, stage, and days pending	High	Functional

6.7 Non-Functional Requirements

Req ID	Requirement Description	Priority	Type
NFR-001	Portal shall load within 3 seconds on standard broadband connection	High	Performance
NFR-002	All uploaded documents shall be encrypted at rest using AES-256 encryption	High	Security
NFR-003	Portal shall support 5,000 concurrent seller registrations without performance degradation	High	Scalability
NFR-004	System shall maintain 99.5% uptime availability	High	Availability
NFR-005	Seller data shall be stored in compliance with Indian IT Act 2000 and data privacy regulations	High	Compliance

7. User Stories with Acceptance Criteria

7.1 Registration Stories

US-001: Seller Self-Registration

> *As a new seller, I want to register on ShopEasy's seller portal using my business email so that I can start the onboarding process independently without contacting anyone.*

Acceptance Criteria:

- Given I am on the seller portal homepage, When I click Register as Seller, Then a registration form shall appear asking for Business Email, Mobile Number, and Password
- Given I enter a valid email and click Send OTP, When system processes request, Then a 6-digit OTP shall be sent to my email within 2 minutes
- Given I enter the correct OTP, When I click Verify, Then my email shall be verified and I shall proceed to business details step
- Given I enter an email already registered, When I click Register, Then system shall display: 'This email is already registered. Please login or use a different email'
- Given I do not complete registration in one session, When I return within 7 days, Then system shall allow me to continue from where I left off

US-002: Business Details Entry

> *As a registering seller, I want to enter my business details on the portal so that ShopEasy can verify my business identity and eligibility to sell.*

Acceptance Criteria:

- Given I have verified my email, When I reach Business Details step, Then I shall see fields for: Business Name, Business Type (Proprietorship/Partnership/Private Limited/LLP), GST Number, PAN Number, and Registered Business Address
- Given I enter a 15-digit GST number, When I move to next field, Then system shall validate GST format and show green tick if valid or red error if invalid
- Given I enter a 10-character PAN number, When I move to next field, Then system shall validate PAN format and show green tick if valid or red error if invalid
- Given all mandatory fields are filled correctly, When I click Save and Continue, Then system shall save my details and advance to document upload step

7.2 Document Upload Stories

US-003: Document Upload

> *As a seller completing onboarding, I want to upload my business documents digitally so that I don't have to email or courier physical copies to ShopEasy.*

Acceptance Criteria:

- Given I am on the document upload step, When I view the page, Then I shall see 4 document upload sections: GST Certificate, PAN Card, Cancelled Cheque, and Address Proof — each with upload button and format instructions

- Given I upload a PDF file under 5MB, When upload is complete, Then file name shall appear with a green Uploaded status and upload date
- Given I try to upload a file larger than 5MB, When I select the file, Then system shall display: 'File size exceeds 5MB limit. Please upload a smaller file'
- Given I upload an unsupported format like .docx, When I select the file, Then system shall display: 'Only PDF and JPG formats are accepted'
- Given all 4 documents are uploaded, When I click Submit Documents, Then system shall confirm submission and display: 'Documents submitted. Verification will be completed within 2 hours'

US-004: Document Rejection and Re-upload

> *As a seller whose document was rejected, I want to understand why it was rejected and re-upload the correct document so that my onboarding can continue without delay.*

Acceptance Criteria:

- Given my GST certificate verification fails, When system updates status, Then I shall receive email with subject: 'Action Required — Document Rejected' with specific rejection reason
- Given I log in after rejection, When I view document status, Then rejected document shall show red Rejected status with rejection reason displayed below it
- Given I click Re-upload on a rejected document, When I upload new file, Then previous rejected file shall be replaced and new verification shall begin automatically
- Given I re-upload correct document, When verification passes, Then status shall update to green Verified and I shall receive SMS confirmation

7.3 Verification Stories

US-005: Automated GST and PAN Verification

> *As a seller who has submitted documents, I want my GST and PAN to be verified automatically so that I don't have to wait days for a manual review.*

Acceptance Criteria:

- Given I have submitted my GST certificate, When system triggers verification, Then GST number shall be verified against government GSTIN API within 30 minutes
- Given GST verification passes, When status updates, Then my portal shall show GST Verified with green checkmark and I shall receive SMS: 'Your GST verification is complete'
- Given GST verification fails due to mismatch, When system detects failure, Then I shall receive email with reason: 'GST number does not match the uploaded certificate. Please re-upload'
- Given API is unavailable, When system cannot verify, Then application shall be routed to Operations team for manual review within 24 hours and I shall be notified

US-006: Bank Account Verification

> *As a seller completing onboarding, I want my bank account to be verified automatically so that I can receive payments from ShopEasy without manual paperwork.*

Acceptance Criteria:

- Given I have submitted my cancelled cheque, When system triggers bank verification, Then a penny drop of Re.1 shall be initiated to my registered bank account
- Given penny drop is successful, When bank confirms credit, Then bank account shall be marked Verified and Re.1 shall be reversed within 24 hours
- Given bank account details on cheque do not match entered details, When verification fails, Then I shall receive email: 'Bank verification failed. Please check account number and IFSC code and re-upload cheque'
- Given bank verification passes, When account is confirmed, Then I shall receive SMS: 'Your bank account is verified. You can now receive payments from ShopEasy'

7.4 Contract and Activation Stories

US-007: Digital Contract Signing

> *As a verified seller, I want to sign the ShopEasy seller agreement digitally so that I can complete onboarding without printing or physically mailing any documents.*

Acceptance Criteria:

- Given all my verifications are complete, When system triggers contract step, Then I shall receive email with subject: 'Action Required — Sign Your Seller Agreement' with eSign link
- Given I click the eSign link, When the agreement page loads, Then I shall see the complete seller agreement with option to scroll and read before signing
- Given I click Sign Agreement, When eSign process completes, Then my digital signature with timestamp shall be captured and agreement shall be marked as Signed
- Given I sign successfully, When system processes signature, Then I shall receive signed agreement copy via email within 5 minutes
- Given signing link expires after 48 hours, When I try to use expired link, Then system shall display: 'This link has expired. A new signing link has been sent to your email'

US-008: Seller Account Activation

> *As a seller who has completed all onboarding steps, I want my seller account to be activated automatically so that I can start listing products and selling immediately.*

Acceptance Criteria:

- Given I have signed the seller agreement, When system detects completed signing, Then seller account shall be automatically created within 2 hours
- Given account is activated, When creation is complete, Then I shall receive welcome email with: Login URL, Username, Temporary Password, and Getting Started Guide PDF
- Given I log in for the first time, When I access my seller dashboard, Then I shall see onboarding completion badge and guided steps for listing my first product
- Given account activation is complete, When system notifies Operations, Then Operations team dashboard shall reflect new seller as Active with activation timestamp

US-009: Application Status Tracking

> *As a seller in the onboarding process, I want to track my application status in real time so that I always know where I stand without calling or emailing ShopEasy support.*

Acceptance Criteria:

- Given I am registered on the portal, When I log in at any stage, Then I shall see a progress tracker showing all 5 onboarding steps with status: Completed (green), In Progress (blue), Pending (grey)
- Given my application moves to a new stage, When status changes, Then I shall receive email and SMS notification within 5 minutes of the change
- Given I have a pending action for more than 24 hours, When system runs daily check, Then I shall receive reminder notification: 'Action Required — Your onboarding is waiting for your input'
- Given I have a question about my application, When I click Contact Support on the portal, Then a pre-filled support ticket shall be created with my application ID and current status

8. Requirement Traceability Matrix (RTM)

The following RTM maps all 38 requirements across 6 functional areas to their corresponding user stories, development fix IDs, and test status across SIT, UAT, and Production environments.

8.1 Registration RTM

Req ID	Requirement	User Story	Dev Fix ID	SIT	UAT	PROD	Remarks
REG-001	Register via business email	US-001	DEV-REG-001	**Pass**	**Pass**	**Pass**	Email validation OK
REG-002	OTP verification for email and mobile	US-001	DEV-REG-002	**Pass**	**Pass**	**Pass**	OTP delivery verified
REG-003	Duplicate email check	US-001	DEV-REG-003	**Pass**	**Pass**	**Pass**	Duplicate blocked
REG-004	Business details collection	US-002	DEV-REG-004	**Pass**	**Pass**	**Pass**	All fields validated
REG-005	Progress indicator display	US-001	DEV-REG-005	**Pass**	**Pass**	**Pass**	5 steps showing
REG-006	Save and resume within 7 days	US-001	DEV-REG-006	**Pass**	**Fail**	**Pending**	Resume data loss UAT

8.2 Document Upload RTM

Req ID	Requirement	User Story	Dev Fix ID	SIT	UAT	PROD	Remarks
DOC-001	GST Certificate upload	US-003	DEV-DOC-001	**Pass**	**Pass**	**Pass**	PDF and JPG tested
DOC-002	PAN Card upload	US-003	DEV-DOC-002	**Pass**	**Pass**	**Pass**	Format validated
DOC-003	Bank Cancelled Cheque upload	US-003	DEV-DOC-003	**Pass**	**Pass**	**Pass**	PDF only verified
DOC-004	Address Proof upload	US-003	DEV-DOC-004	**Pass**	**Pass**	**Pass**	Multiple types accepted

DOC-005	File format and size validation	US-003	DEV-DOC-005	**Pass**	**Pass**	**Pass**	Error messages clear
DOC-006	Document status display	US-004	DEV-DOC-006	**Pass**	**Pass**	**Pass**	Status colours correct
DOC-007	Re-upload rejected document	US-004	DEV-DOC-007	**Pass**	**Pass**	**Pass**	Previous file replaced

8.3 Verification RTM

Req ID	Requirement	User Story	Dev Fix ID	SIT	UAT	PROD	Remarks
VER-001	GST API verification within 30 mins	US-005	DEV-VER-001	**Pass**	**Pass**	**Pass**	API response avg 8 mins
VER-002	PAN API verification within 30 mins	US-005	DEV-VER-002	**Pass**	**Pass**	**Pass**	NSDL API stable
VER-003	Penny drop bank verification	US-006	DEV-VER-003	**Pass**	**Pass**	**Pass**	Re.1 credit and reverse OK
VER-004	Notification on verification result	US-005	DEV-VER-004	**Pass**	**Pass**	**Pass**	Email and SMS sent
VER-005	Route to Operations on API failure	US-005	DEV-VER-005	**Pass**	**Pass**	**Pass**	Fallback flow verified
VER-006	Manual override by Operations	US-005	DEV-VER-006	**Pass**	**Pending**	**Pending**	Admin UI in progress

8.4 Contract, Activation and Tracking RTM

Req ID	Requirement	User Story	Dev Fix ID	SIT	UAT	PROD	Remarks
CON-001	Send eSign agreement after verification	US-007	DEV-CON-001	**Pass**	**Pass**	**Pass**	eSign trigger verified
CON-002	Seller reviews agreement before signing	US-007	DEV-CON-002	**Pass**	**Pass**	**Pass**	Full doc scrolla

							ble
CON-003	Capture digital signature with timestamp	US-007	DEV-CON-003	**Pass**	**Pass**	**Pass**	IP and timestamp logged
CON-004	Send signed copy within 5 mins	US-007	DEV-CON-004	**Pass**	**Pass**	**Pass**	Avg delivery 2 mins
CON-005	eSign link expires after 48 hours	US-007	DEV-CON-005	**Pass**	**Pass**	**Pass**	New link auto-sent
ACT-001	Auto account creation within 2 hours	US-008	DEV-ACT-001	**Pass**	**Pass**	**Pass**	Avg 45 mins verified

9.1 Open Defects and Pending Items

ID	Req ID	Description	Severity	Status
DEF-001	REG-006	Seller loses saved progress when resuming after browser close in UAT	Medium	**Fail**
DEF-002	VER-006	Operations manual override admin UI not built — in development	Medium	**Pending**
DEF-003	TRK-004	Operations all-applications dashboard UAT in progress — pending completion	Low	**Pending**

10. Glossary

Term	Definition
Seller Portal	Self-service web platform where new sellers complete the entire onboarding process independently
GSTIN	Goods and Services Tax Identification Number — 15-digit unique identifier assigned to every GST-registered business in India
PAN	Permanent Account Number — 10-character alphanumeric identifier issued by Income Tax Department of India
Penny Drop	Bank verification method where Re.1 is credited to the seller's bank account to confirm account existence and details are correct
eSign	Electronic signature — legally valid digital signature used to sign documents online without physical paperwork
KYC	Know Your Customer — process of verifying seller's identity and business legitimacy before onboarding
GMV	Gross Merchandise Value — total value of products sold through the marketplace over a period of time
OTP	One Time Password — time-limited 6-digit code sent to email or mobile for authentication verification
RACI Matrix	Responsible, Accountable, Consulted, Informed — framework defining roles and responsibilities for project activities
RTM	Requirement Traceability Matrix — document mapping requirements to user stories, dev fixes, and test validation
Cancelled Cheque	A cheque crossed with two lines and written CANCELLED — used to verify bank account name, number, and IFSC code
Operations Team	ShopEasy internal team responsible for managing seller relationships and resolving onboarding exceptions
SIT	System Integration Testing — testing environment where all integrated components are validated together
UAT	User Acceptance Testing — testing environment where business stakeholders validate requirements before production
